INTEGROUS RISK SOLUTIONS

New threats are arising daily due to the current social climate our country faces. Organizations are being placed in riskier scenarios and left without the proper guidance they need to succeed.

Unforeseen threats such as regulation changes, evolving politics, negative impacts on reputation, and pandemics can be tempered by having plans in place before damage can be done.

Integrus not only creates a customized plan, but we also provide the support our clients need to feel confident facing any threat. When a company feels secure, the benefits trickle down through the entire organization.

Each organization is unique and faces different threats. Integrus will collaborate with companies and their stakeholders to understand their specific needs, security risks, and current plan of action. We will assess the company's liabilities and design an effective framework that shifts your organization from reactive to proactive.

Risk Management Infused with Technology

Integrus Risk Solutions focus is to provide our clients with comprehensive services to accommodate any security and risk management need. Integrity is in our name, and it is our mission to provide quality solutions to our clients for all conceivable circumstances.

Integrus recognizes the need to alleviate risk in the lives of high-profile individuals, corporations, and organizations. Everything we do is guided by years of experience. Whether you require security, assistance investigating a complex issue, or are concerned with traveling overseas – our risk management and security professionals are there to alleviate the burden and provide **confidence and freedom** for you, your business, and your family.

Our relationships with strategic partners allows us to provide you access to an **extraordinary array of services** found nowhere else within a single provider. This document provides an overview of the Integrus services most sought after by our clients. All our solutions are customizable and can be tailored to meet the demands of any individual or organization.

Integrus provides risk management solutions tailored from the start to meet the specific needs of our clients. While most security companies serve only one need, we manage complex projects through a joint approach of highly specialized individuals.

Our solutions fall into individual-yet-integrated divisions: Analyst Services, Protective Services, Risk Management, Training, and Special Projects. We understand the unique challenges our clients and their families' face along with the complexity of the risk.

Analyst SERVICES

Cyber Security:

Socially engineered malware, ransomware, and denial of service attacks are just some of the com-mon cyber threats facing us today. Not only are highly publicized data breaches increasing in numbers, but they are also increasing in severity.

Integrous cybersecurity strategists can inspect current computer systems and network infrastructure to proactively individual assets and intellectual property. We will meet with the client to illustrate how quickly threats are detected, how efficiently they are managed, and provide dynamic and comprehensive strategies that will initiate an effective response.

Due Diligence:

Keeping your organization and loved ones safe is our top priority. When it comes to background inquiries, limiting yourself to open-source material can give you a false sense of security and cause unnecessary risks.

Integrous intelligence analysts are consistently performing investigations at the next level while providing an added layer of depth to understanding the faces closest to your business and family.

We can help you gather essential information that can strategically guide your decision making. Whether you require an evaluation of a potential business partner or assets for acquisition, exercising the necessary amount of care is what separates success from failure.

Protective SERVICES

Executive Protection:

Integrous' Executive Protection Services are designed to prioritize the safety of our clients and anticipate the potential risks due to their wealth, occupation, status, travel destinations, and other contributing factors. We design our plans to provide our clients with privacy and peace of mind so they can focus on what is most important.

Workplace Security:

We work around the clock to provide you with experts in their field. In addition, we use the newest technology, intelligence assessments, and innovative solutions to better identify and mitigate potential threats to your staff, visitors, and facilities.

Venue & Event Security:

When it comes to your venue, our team's focus is on hospitality. We take pride in our customer service and professionalism while ensuring all patrons' safety and security is the utmost priority before, during, and after the event. Our team stays in constant contact using the latest technology to ensure the quickest response in the event of an emergency.

Security Drivers:

Integrous has provided drivers for celebrities, heads of state, and Fortune 500 executives. We afford clients with the option to maintain a one-time, part-time, or even full-time Executive Driver. You can trust our highly trained, screened, and experienced staff.

Estate Security:

We protect our clients' loved ones and property from a myriad of threats, including home invasions, disturbances, trespassing, privacy invasions, menacing behavior, and other potential incidents. Our state-of-the-art Intelligence Division can develop threat assessments, security tools, policies, procedures, and full-service physical security solutions which are all aimed at mitigating risk.

Protective Surveillance:

Integrous can provide protection when standard security methods may be intrusive or inappropriate. Our approach consists of leveraging technology and physical surveillance strategies to develop ongoing intelligence and risk assessments while blending into the environment.

Risk Management SERVICES

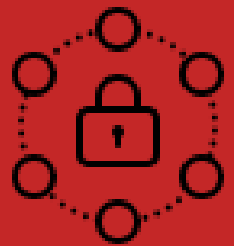

Threat Assessments:

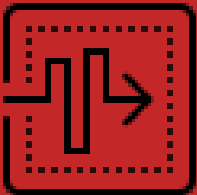

Securing your organization's personnel and assets is a process of continual involvement and vigilance. Whether you're a corporate, hospitality, educational, or public entity, we offer a wide array of solutions and services that identify and assess your threats, vulnerabilities, and negative opportunities. We provide you with knowledge and strategies to improve existing security measures that will have minimal impact on business operations.

Business Continuity Planning:

In times of crisis, an organization is at its weakest. Integrous provides analytical services to create a prevention and recovery plan. This can allow your business to maintain its essential functions in times of vulnerability and enable ongoing operations before, during, and after an emergency.

Complex Case Investigations:

Investigating corporate fraud, legal issues, and sensitive personal matters requires a sophisticated understanding of the inner workings of a corporation. From detection to prevention, we have the tools to help you find the root cause of any problem. Our specialists will then develop solutions and implement them with the discretion you expect.

Red Teaming:

Integrous can provide your organization with the ability to improve its security and response by providing a thorough probing of the measures currently in place. Using physical methods, cyber penetration testing, and alternative intelligence analysis, Integrous can address the specific vulnerabilities that your organization may face before they are exploited by another party.

Risk Management SERVICES

Travel Assessments:

International journeys are a great opportunity to make memories for you and your family, but traveling to countries outside your comfort zone comes with a set of challenges and security risks. Integrous ensures your safety and preparation before the wheels ever leave the ground. We seek out information and intelligence about your destination and report back to you. We can even provide an on-ground, advance party assessment or a personal security detail during your travels.

Country Briefs:

Individuals and organizations alike may require knowledge of activities in other countries. Whether you're investing or traveling, intelligence on foreign countries provides invaluable insight into your ventures' success. Our analysts can help you understand the politics, geography, financial stability, and cultural nuances required for effective decision making.

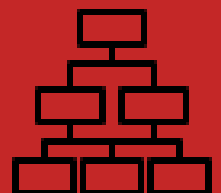

Secure Travel Planning:

Integrous provides our clients with peace of mind by securing safe, customized transportation, accommodations, and other travel services — both domestically and abroad. Unlike a chauffeur, taxi, limousine, or private driver services, Integrous provides safe and secure transportation through our network of vetted professionals.

Security Program Development:

Organizations often lack the ability or expertise to mitigate internal risks such as theft (both physical and intellectual), sabotage, workplace violence, and other types of financial loss. Funding a security department can be futile without the proper guidance or policies and procedures in place. Integrous will work with you and your employees to develop a comprehensive security plan that through analysis, education, and training will give your organization both the tools and confidence it needs to succeed.

Special PROJECTS

- From rotary to fixed-wing charters, our staff can work with you to identify and procure your global aviation requirements.
- Everyday organizations make efforts to se-cure their facilities with outdated or incompatible systems. Integrous' specialists assist building and security managers who are seeking solutions that are easy and effective to use. From system discovery, to maintenance and training, we're the extra set of eyes helping to keep you safe.
- With the growing popularity of drones, using drones for nefarious purposes is on the rise. Criminals have recently deployed drones to hack wi-fi networks, survey homes and neighborhoods for vulnerabilities, as well as spy on individuals, corporations, and private events. Integrous can employ cutting edge technology that detects, tracks, and reports unauthorized drones in your airspace.
- Trusted evacuation and kidnap/ransom services are rarely discussed in daily life yet are highly valued. Integrous clients benefit from a hand-picked and real-world tested team of elite professionals dedicated to protecting lives in questionable scenarios.
- Integrating GPS tracking and real-time locating systems into your security strategy improves situational awareness, constructs a common operating picture, and provides the ability for immediate emergency notifications.
- Whether you are monitoring an executive, a family member traveling overseas, or a vehicle fleet transporting high-value assets, we can help you identify strategic tracking solutions that can increase your success.
- Many situations require enhanced considerations in securing the safety of our clients. Our access to armored vehicle capabilities can help ensure that you are protected while traveling in a risky environment.

CORPORATE INVESTIGATIONS

Corporate misconduct is widespread. Fraud, bribery, corruption, or other threats are pervasive in corporate dealings such as foreign transactions, third party deals, accounting practices, or within reporting obligations.

In fact, many corporations are finding it beneficial to hire an investigator to prevent these forms of misconduct, respond to federal investigations, and safeguard their assets, reputation, and business operations for the future.

Integrinous Risk Solutions' resources and cross-industry expertise drive us to the forefront of the risk management industry. We offer real-time assistance, proven solutions, and strategic planning to help organizations navigate the most unpredictable times with confidence.

Our experience comes from our team of U.S. military special forces, specialized law enforcement, intelligence, corporate security executives, and program management – which is further supplemented by our vast network of industry-leading professionals.

Integrinous has trained thousands of private sector entities, first responders, educators, military, and government contract personnel. It is our goal and commitment to deliver security, consulting, and training-related services to our clients.

Our subject matter experts come from elite careers in federal and local law enforcement, military special operations, private security, and various intelligence agencies.

INTEGROUS RISK SOLUTIONS

**Thank you for taking the time to learn more about our commitment to your success. Our proven methods have shown to significantly mitigate risk over the entire spectrum of personal and professional lives.
Let Integrus Risk Solutions provide you with peace of mind.**
